

All Terms (Alphabetical Order)			
Abducens nerve	Ciliary ganglion	Foramina of the cribriform plate	Jugular foramen
Abducens nucleus	Ciliary muscles	Forceps major of corpus callosum	Lateral apertures
Accessory nerve	Cingulate gyrus	Forceps minor of corpus callosum	Lateral corticospinal tract
Accessory nuclei	Cingulate sulcus	Fornix	Lateral fissure
Accessory oculomotor nucleus	Cingulum	Fourth ventricle	Lateral geniculate nucleus
Acetylcholine	Clastrum	Frontal eye fields	Lateral horn of spinal cord
Allodynia	Cochlear nucleus	Gag reflex	Lateral olfactory striae
Amygdala	Commissural fibers	Gate control theory	Lateral pain system
Angular gyrus	Complete lateral gaze palsy	Geniculate ganglion	Lateral rectus muscle
Anhidrosis	Conduction aphasia	Genu of internal capsule	Lateral semicircular canal
Anterior cerebral artery	Confluence of the sinuses	Glial cells	Lateral spinothalamic tract
Anterior choroidal artery	Conscious proprioception	Globus pallidus externa	Lateral ventricle
Anterior commissure	Corneal blink reflex	Globus pallidus interna	Lentiform nucleus
Anterior communicating artery	Corona radiata	Glossopharyngeal nerve	Levator palpebrae superioris
Anterior corticospinal tract	Corpus callosum	Grey matter	Lingual gyrus
Anterior inferior cerebellar artery	Cuneus	Gyrus	Longitudinal fissure
Anterior limb of internal capsule	Cupula	Gyrus rectus	Lower motor neuron
Anterior nuclei of the thalamus	Decussation of the pyramids	H test	Macula
Anterior semicircular canal	Dermatome	Hippocampus	Mammillary nuclei of the hypothalamus
Anterior spinal artery	Diencephalon	Homeostasis	Mandibular division of trigeminal nerve
Anterior spinothalamic tract	Dilator pupillae muscles	Homonymous hemianopsia	Massa intermedia of thalamus
Anterior white commissure of spinal cord	Diplopia	Horizontal gaze coordination	Maxillary division of trigeminal nerve
Anterograde amnesia	Direct "go" pathway	Huntington disease	Medial geniculate nucleus
Arachnoid mater	Disinhibition	Hyperacusis	Medial lemniscus
Arcuate fasciculus	Dominant hemisphere	Hyperalgesia	Medial limbic circuit (Papez circuit)
Areflexia	Dopamine	Hyperreflexia	Medial longitudinal fasciculus
Association fibers	Dorsal horn of spinal cord	Hypoglossal canal	Medial olfactory striae
Ataxia	Dorsal motor nucleus of CN X	Hypoglossal nerve	Medial pain system
Ballismus	Dorsal root ganglion	Hypoglossal nucleus	Medial rectus muscle
Basilar artery	Dorsal stream of visual processing	Hyporeflexia	Median aperture
Biceps brachii reflex	Dorsal striatum	Hypothalamus	Medulla
Bipolar neuron	Dura mater	Indirect "stop" pathway	Medullary pyramid
Bitemporal hemianopsia	Dysarthria	Inferior cerebellar peduncle	Mesencephalic sensory nucleus
Broca's aphasia	Dysdiadochokinesia	Inferior colliculi	Mesencephalon
Broca's area	Dysesthesia / paresthesia	Inferior frontal gyrus, pars opercularis	Metencephalon
Calcaneal reflex	Endogenous opioids	Inferior frontal gyrus, pars orbital	Midbrain
Calcarine fissure	Epidural space	Inferior frontal gyrus, pars triangular	Middle cerebellar peduncle
Cardioacceleratory center	Episodic memory	Inferior glossopharyngeal ganglion	Middle cerebral artery
Cardioinhibitory center	Epithalamus	Inferior longitudinal fasciculus	Multipolar neuron
Cauda equina	External capsule	Inferior oblique muscle	Myelencephalon
Caudal nucleus solitarius	Extreme capsule	Inferior olivary nuclei	Myotome
Caudate nucleus	Facial motor nucleus	Inferior rectus muscle	Nodule of the cerebellum
Cavernous sinus	Facial nerve	Inferior sagittal sinus	Non-conscious proprioception
Central canal	Falx cerebelli	Inferior salivatory nucleus	Non-dominant hemisphere
Central nervous system	Falx cerebri	Inferior vagal ganglion	Norepinephrine
Central sensitization	Fasciculus cuneatus	Insula	Nucleus ambiguus
Central sulcus	Fasciculus gracilis	Internal acoustic meatus	Nystagmus
Cerebral aqueduct	Flaccid paresis or paralysis	Internal arcuate fibers	Occipitofrontal fasciculus
Cerebral cortex	Flocculus of the cerebellum	Internuclear ophthalmoplegia	Oculomotor nerve
Cerebral peduncle	Foramen magnum	Interpeduncular fossa	Oculomotor nucleus
Cerebrocerebellum	Foramen ovale	Interventricular foramina	Oculosympathetic paresis (Horner's syndrome)
Chief sensory nucleus	Foramen rotundum	Intralaminar nuclei of the thalamus	Olfactory bulb
Choroid plexus	Foramen spinosum	Jaw jerk reflex	Olfactory digestive process reflex

Olfactory nerve	Ptosis	Tela choroidea
Olfactory salivation reflex	Pupillary light reflex	Telencephalon
Olfactory tract	Putamen	Temporal optic radiations
Olive	Radicular arteries	Tentorium cerebelli
Ophthalmic artery	Raynaud's syndrome	Thalamus
Ophthalmic division of trigeminal nerve	Referred pain	Third ventricle
Optic canal	Reflexive urinary incontinence	Tonotopic organization
Optic chiasm	Retinotopic organization	Total monocular blindness
Optic nerve	Retrograde amnesia	Transverse fissure
Optic tract	Rhombencephalon	Transverse sinus
Otic ganglion	Rostral nucleus solitarius	Transverse temporal gyrus
Overflow urinary incontinence	Rubrospinal tract	Triceps brachii reflex
Parahippocampal gyrus	Saccadic eye movement	Trigeminal ganglion
Paramedian pontine reticular formation	Sacculae	Trigeminal motor nucleus
Parasympathetic nervous system	Segmental medullary arteries	Trigeminal nerve
Paraventricular nucleus of the hypothalamus	Semantic memory	Trochlear nerve
Parietal optic radiations	Serotonin	Trochlear nucleus
Parieto-occipital sulcus	Short association fibers	Uncinate fasciculus
Parkinson's disease	Sigmoid sinus	Upper motor neuron
Patellar reflex	Smooth pursuit eye movement	Utricle
Peripheral nervous system	Somatosensory association area	Vagus nerve
Peripheral sensitization	Somatotopic organization	Ventral anterior nucleus of the thalamus
Pia mater	Spastic paresis or paralysis	Ventral horn of spinal cord
Pineal gland	Sphincter pupillae muscles	Ventral lateral nucleus of the thalamus
Pituitary gland	Spinal cord	Ventral posterior lateral nucleus of the thalamus
Pons	Spinal lemniscus	Ventral posterior medial nucleus of the thalamus
Pontine arteries	Spinal sensory nucleus	Ventral stream of visual processing
Pontine micturition center	Spinocerebellum	Vermis of the cerebellum
Pontine storage center	Spiral ganglion	Vertebral artery
Pontomedullary junction	Strabismus	Vestibular ganglion
Pontomesencephalic junction	Straight sinus	Vestibular nuclei
Positive Babinski sign	Subarachnoid space	Vestibulocerebellum
Post-central gyrus	Subcallosal gyrus	Vestibulocochlear nerve
Posterior cerebral artery	Subdural space	Vestibuloocular reflex
Posterior commissure	Submandibular ganglion	Visual accommodation
Posterior communicating artery	Substantia nigra	Wernicke's aphasia
Posterior inferior cerebellar artery	Subthalamic nucleus	Wernicke's area
Posterior limb of internal capsule	Sulcus	White matter
Posterior semicircular canal	Superior cerebellar artery	
Posterior spinal arteries	Superior cerebellar peduncle	
Pre-central gyrus	Superior cervical ganglion	
Pre-motor and supplementary motor areas	Superior colliculi	
Precuneus	Superior longitudinal fasciculus	
Prefrontal cortex	Superior oblique muscle	
Primary auditory cortex	Superior orbital fissure	
Primary gustatory cortex	Superior rectus muscle	
Primary motor cortex	Superior sagittal sinus	
Primary olfactory cortex	Superior salivatory nucleus	
Primary somatosensory cortex	Superior temporal gyrus	
Primary visual cortex	Superior vagal ganglion	
Procedural memory	Suprachiasmatic nucleus of the hypothalamus	
Projection fibers	Supramarginal gyrus	
Prosencephalon	Supraoculomotor area	
Pseudounipolar neuron	Sympathetic nervous system	
Pterygopalatine ganglion	Synesthesia
